Built in the 17th century, with an original nucleus consisting of a bell tower dating back to Roman times and an 8th century Lombard church, this villa is an elegant structure rich in history set in a 25-hectare park of extraordinary natural beauty . Although a short distance from urban centres, the villa is an intimate, reserved place with great charm where you can breathe a familiar atmosphere and is now available for the organization of high-class private and corporate events.

The villa is located on top of a hill located within the land holding of the same name of 350,000 m2, of which it occupies more than two thirds. The villa is located in a privileged position on top of the hill, this placement makes it seem suspended in a limbo immersed in silence and isolation. An avenue surrounded by wooded areas over 1,500 meters long leads to the villa. A gentle climb towards the hill from which you reach the plain where the villa is located, surrounded by a vast lawn with numerous trees and a large swimming pool.

The villa is also equipped with an elegant white wooden tensile structure, built around a stone fountain and capable of accommodating up to 200/220 people. If necessary, the structure can be fully closed with transparent sheets, which guarantee guests the feeling of living in a perfectly integrated space open towards the surrounding park.

Still present and constituting the central nucleus of the villa, the bell tower and the consecrated church have been the subject of an important building recovery which has brought to light the splendid frescoes and stone walls thus giving the complex the original intimate and extraordinary beauty.
